

Congratulations on your purchase!

You have bought a unique Vincent Sheppard table made of high-quality and above all durable oak. This table will serve you for many years. However, this does not mean it's maintenance free. Please treat this natural product with care, keep it clean and follow some instructions below.

Variations in wood grain and color, knots and other naturally occurring characteristics are inherent to solid wood. We believe that these imperfections contribute to the charm of your table.

ABOUT WOOD

Wood continues to absorb and release humidity throughout its life. Therefore please pay attention to the following guidelines:

Recommended humidity in the room: between 40% and 60%

Ideal room temperature: 21°C during the day, not below 14°C at night. Avoid exposure to extreme conditions. Don't put your furniture near heating sources, highly air-conditioned spaces or humid environments.

Like any natural material, wood will darken or yellow during its lifetime. Therefore it is recommended to shield your furniture from direct sunlight and to move objects placed on the furniture from time to time, to prevent color differences. Nevertheless, changes in color do not in any way affect your furniture's durability or functionality.

Use placemats to prevent hot pots, pans and cold glasses or bottles from leaving marks on the furniture.

ABOUT VARNISH

Our varnished tables are finished with a high performance, water-based, polyurethane lacquer for the protection of the wood and has an excellent chemical and mechanical resistance. Clean with a mild solution of water and natural soap.
